

**MINING IS AT
OUR CORE**

**MAKE ONTARIO
YOUR NEXT
BIG IDEA**

ONTARIO, CANADA - BE PART OF A WORLD-CLASS MINING SUPPLY AND SERVICES SECTOR

The province of Ontario is home to a world-class mineral endowment and new mine development is happening at record levels.

In Ontario, there are 43 operating mines with another 6 scheduled to open by 2017 and 8 by 2024. Of these new mine developments, 6 will be open pit operations which is a significant shift from our traditional underground operations.

New open pit operators in Ontario have estimated that a total of \$87 million per year in supplies and services will have to be imported from foreign jurisdictions to meet construction needs for each new development.

Additionally, a further \$65 million each year is expected to be imported to satisfy the annual operating requirements once the project is in production.

Considering the transition in Ontario's mining methodology, if supplying open pit operations is your expertise, then this is where your company needs to be if you are a world leader in:

- Industrial Machinery
- Transportation Equipment
- Electrical Equipment
- Fabricated Metal Products
- Primary Metal Products
- Computer and Electronic Products
- Chemical Products
- Environmental Services

To further discuss these opportunities and to learn more about expanding your business in Ontario, contact:
